

Table 1

<b>HBP function</b>	<b>Mono-functional agonist</b>	<b>Mono-functional antagonist</b>
Capillary leakage		Edema, SIRS
Chemotaxis	Wound healing, local infections	Re-perfusion injury, brain edema
Monocyte activation	Local and systemic infections, (tumors)	Inflammatory diseases, SIRS
Activation contact phase system	(Infection)	SIRS, post-operative bleeding, pain, (inflammation)
Anti-apoptosis	Degenerative diseases	(Tumors)
Endotoxin binding	Endotoxin removal from septic patients	

Potential applications for mono-functional peptides
